Langfuse

LangFuse

Collects data about our text generation process
and presents it in a great interface

There are tons of platforms like this, and there will
probably be more in the future

If you understand one, you'll figure out the others very quickly

We are using LangFuse because you can self-host, 100%
open source, and has great LangChain integration

prod-langfuse.fly.dev

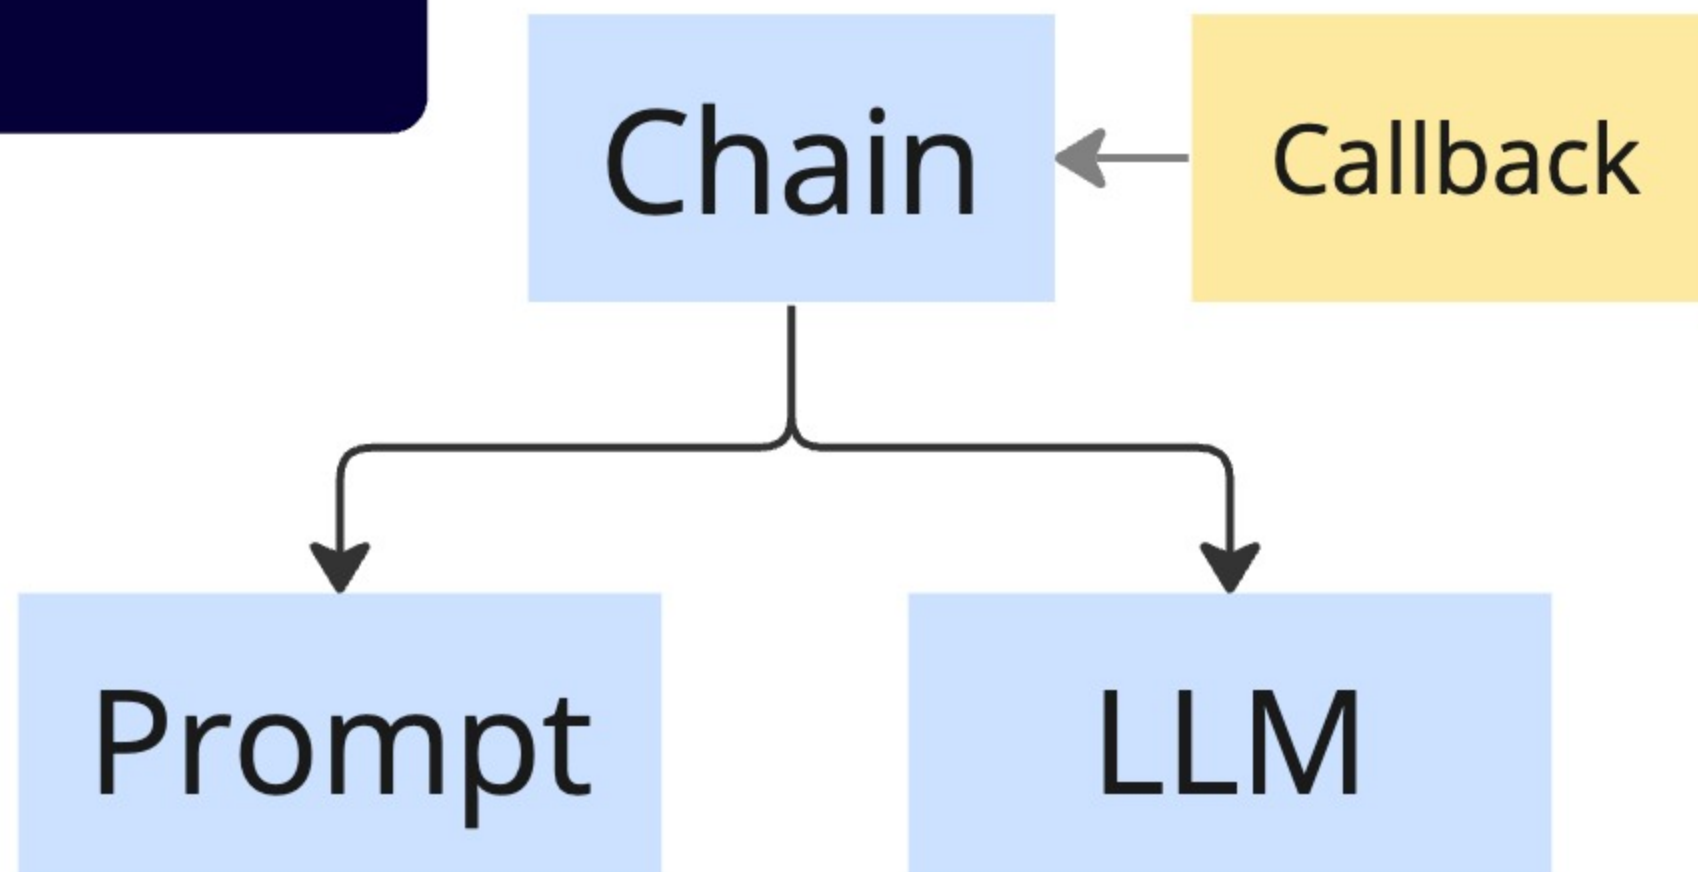

Copy of Langfuse hosted by me. Will always work, but I will delete data every now and then

langfuse.com

Official Langfuse platform. Might not exist forever, who knows.

Callback Applied at Creation

```
1  
2 llm = ChatOpenAI(callbacks=[  
3     MyCallback()  
4 ])  
5 chain = LLMChain(  
6     llm=llm,  
7     prompt=prompt  
8 )
```

Callback Applied at Call

```
1 result = chain(  
2     "What country...",  
3     callbacks=[MyCallback()]  
4 )
```
